

# Smart cities, offices, homes

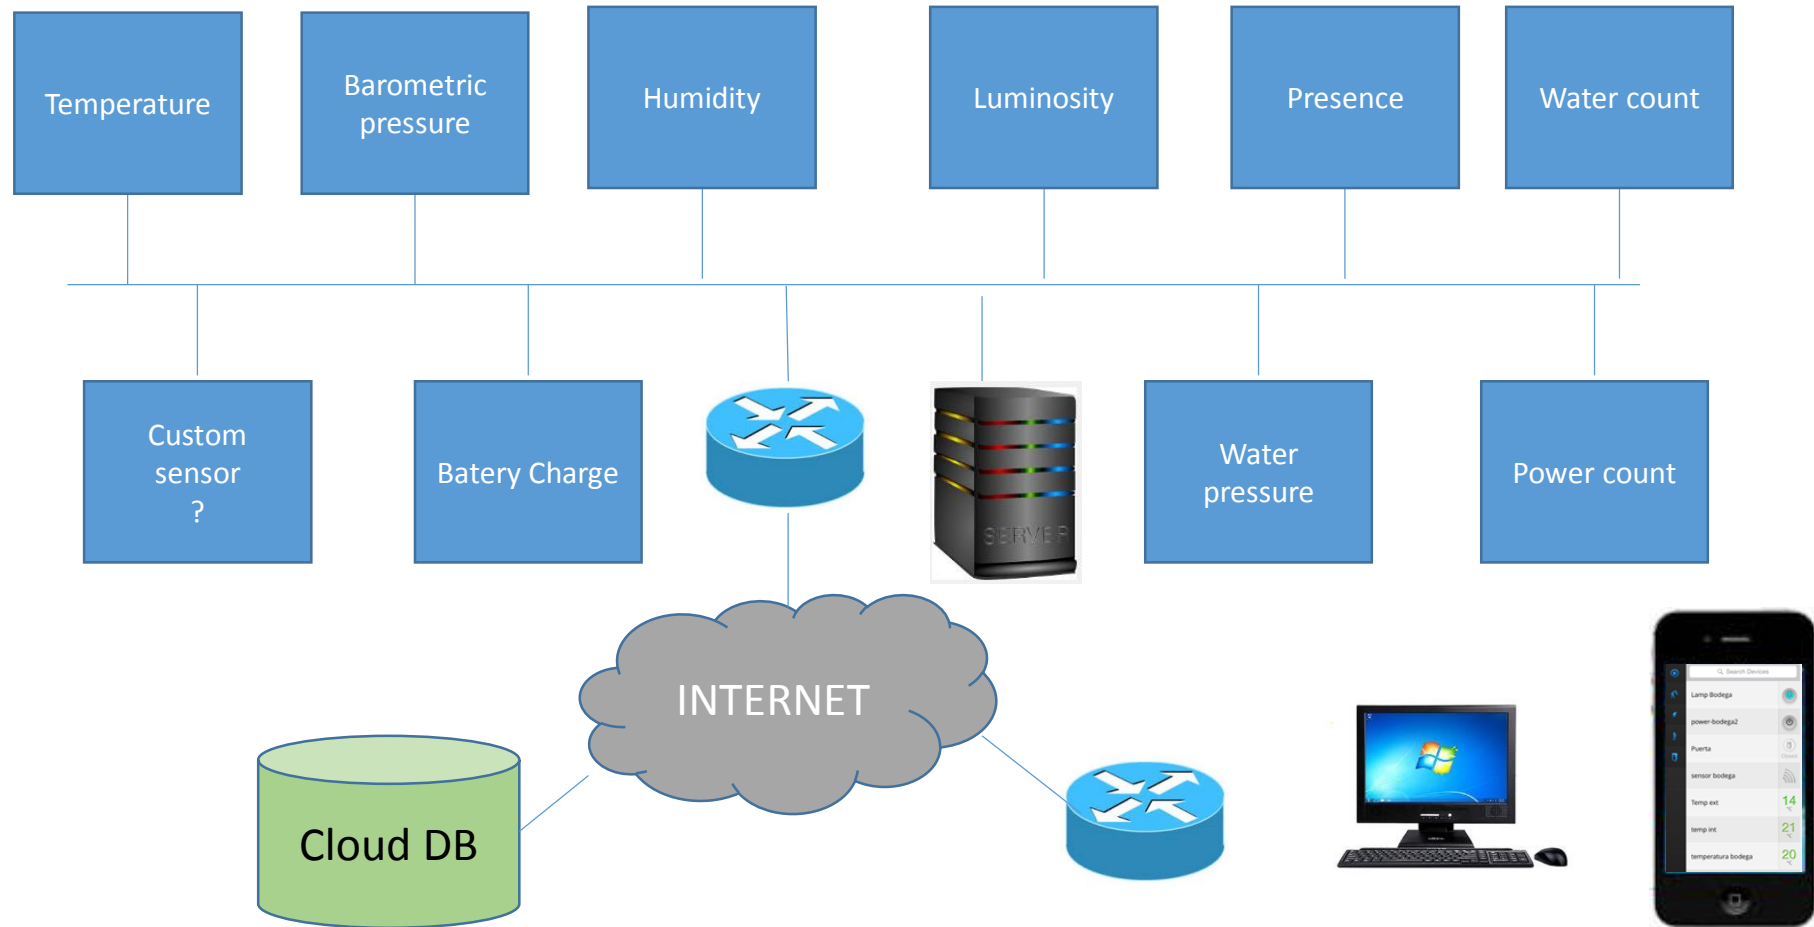

With the evolution of technology in the market have many devices that allow us to obtain real-time sensor readings and store them.

# Sensor topology

Using standard ethernet wifi is offered the possibility of centralizing the management, control and storage of these systems, regardless of location.

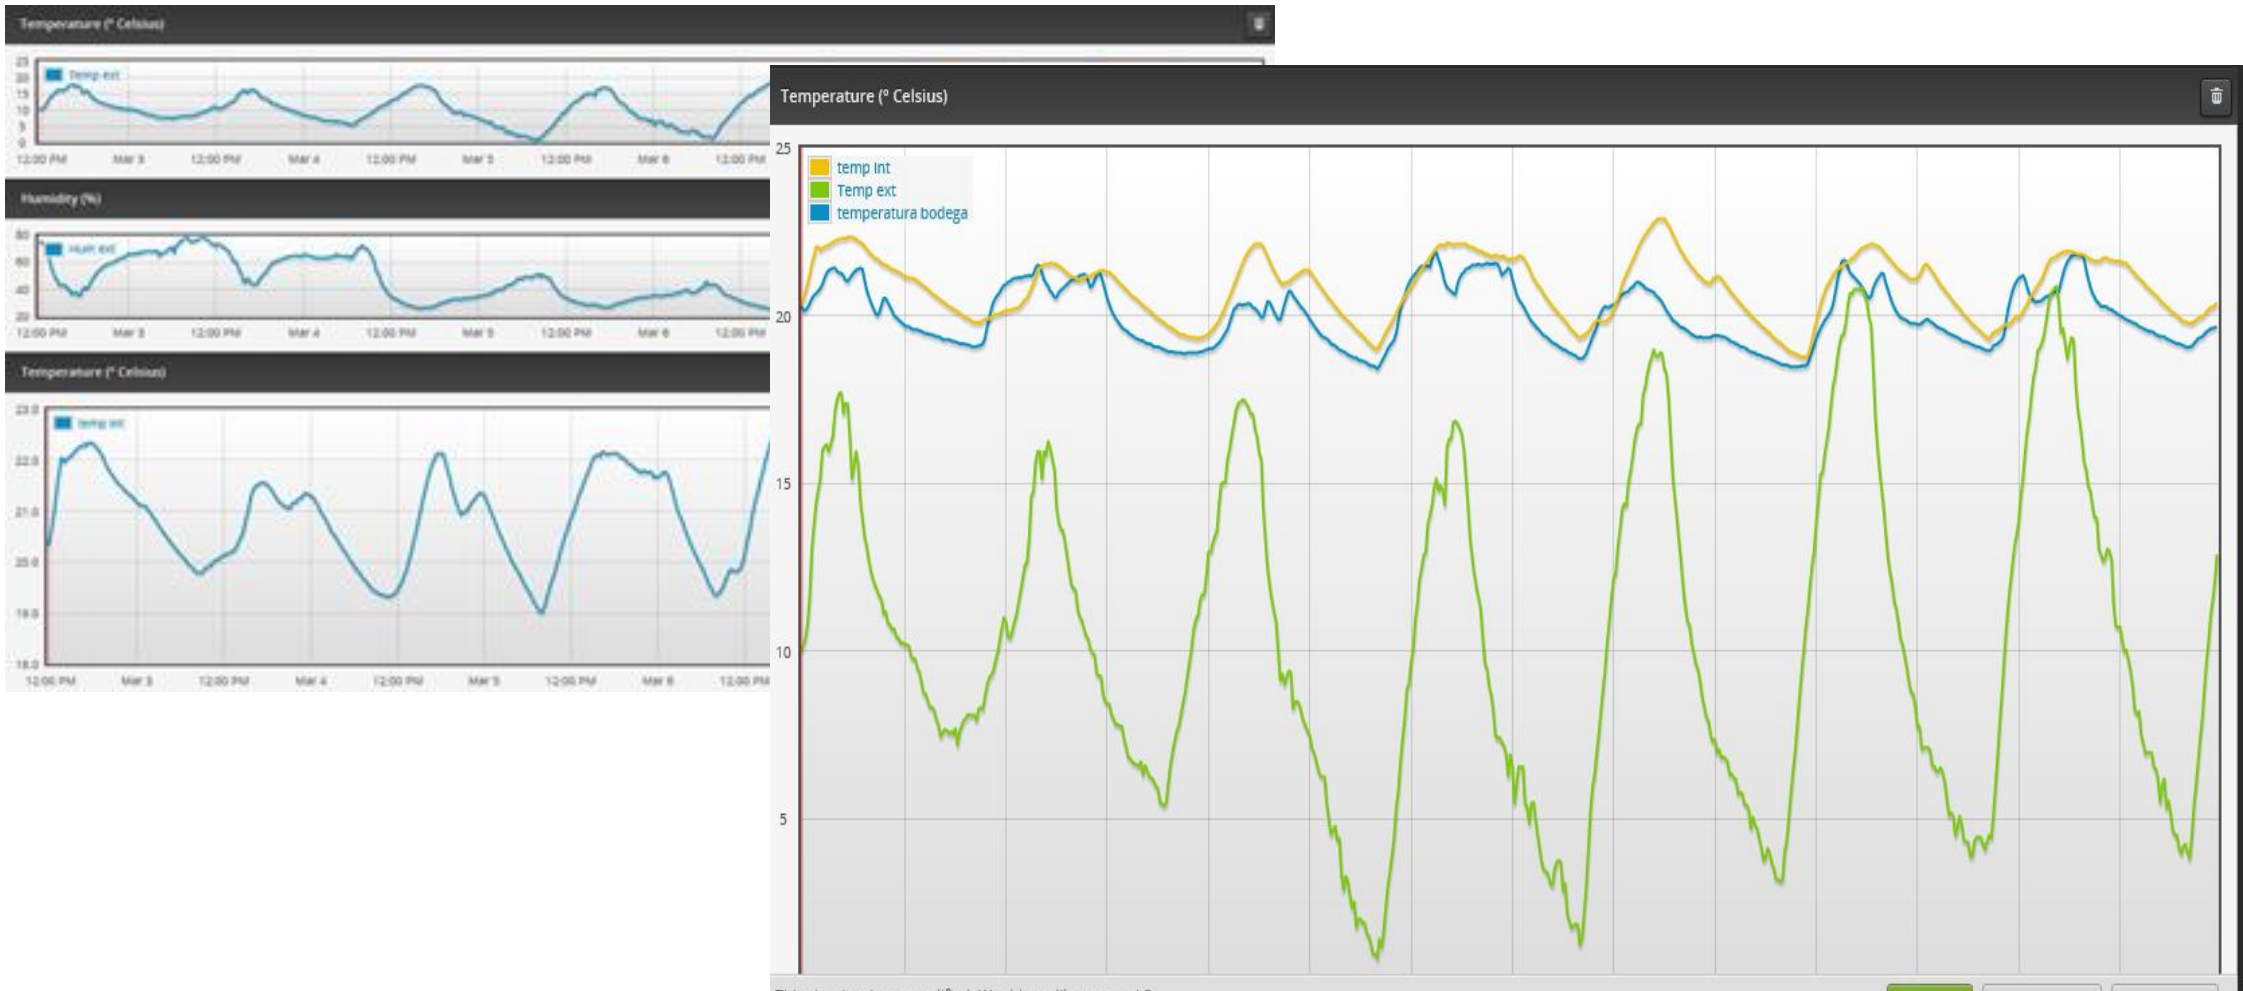

# Remote Access & cloud storage

Remote access and remote cloud storage systems broaden the possibilities of these systems

# Compare, report or track results

Whatever your need, you can obtain graphical results of monitoring and control systems

# Sensor whatever you need

Presence, power, water pressure, light, water flux.....
